Midterm Paper: ADSE Enablement Sessions Reflection

During my session of ADSE meeting and using their data analytics app/website called SAP, we manipulated the data, filtered the data, renamed the data, so that we can easily visualize the data set that was given to us easily. By following the steps of the presenter, I easily understood what to do, how to do, when to do. They were very helpful during the session and answered all the questions that were asked professionally, also exploring the SAP made me realize that it is an easy tool to use to visualize data easily, it can load multiple file types, we used xlxs(excel).

I also accomplished their hour of code:
